

Dear readers,

the editorial staff thanks you, that you in the month March 2011 our „Wohnungswirtschaft heute TECHNIK“ magazin have for the leading German-speaking magazine of the housing association „with „Wohnungswirtschaft heute“ refined. Almost 20. 000-mal was downloaded the March notebook of you. That corresponds for instance to the really sold edition as it is called by print media as an evidence of a great range. For us in the editorial staff that is incentive, to supply you also furthermore with currently self investigated contributions, information from science, technique and industry as well as compartment contributions of external authors. In the more than two years since market launch of our internet technical journal for the housing association the number has itself our subscribers‘, that“ to read „month today regularly for month“ the „Wohnungswirtschaft heute“, constantly increases and climbs continuously further.

The content of the disbursement april 7th:

In this edition of „Wohnungswirtschaft heute TECHNIK“ the main topic of „facade and facade insulation“ is. Here it is a question especially of the opportunities of the energy efficiency from facade constructions near the new building and during the renovation of supply constructions. Also the further development of new heat insulants is represented from view of the science and which possibilities make be derived from that for the construction. But also on the „Nachhaltigkeit“ topic of construction products we tell. In word and picture we present the energetic renovation of a

facade and facade insulation

living and business house, the doubled-up of heat networks as well as a novel ventilated system with ceramic facade clothing point at „WDVS“. The contribution „the vacuum insulation presents“ „Lean Thermal Insulation“ and with the photovoltaics we show that there is another remaining risk.

The new calculation of the wind suction protection can simply be carried out with calculation-tooles in the Internet. „Durchsturzicherheit“ near light domes, With fixing system for „WDVS“ and the mold on the track there is again a lot of widely diversified and helpful information for the Wohnungswirtschaft. They find information on renewal energies in the book recommendation „energy costs for buildings lower“.

You find our offer interesting, you keep on recommending us - you have objections or tips, you make us know the editorial staff looks forward to a lively discussion please it.
